

South Group 4 Fire

SCAT Team Daily Summary

(SCAT = Shoreline Cleanup Assessment and Technique)

Activity Date: 12/7/2019

Prepared by: Robert Simmons, SCAT Coordinator, CTEH

SCAT Team 1 Lead – Ernie Shirley, CTEH

Participating Team Members, Stakeholders, Other

- Paul Gracianette-CTEH
- Claire Iseton-TPWD

SCAT Team 1 Activity Today: TPWD rep participated with team today and spent time in Division E and then in Division D to look at a reported dead deer.

Significant Comments/Observations:

Division E – Water level has dropped further since yesterday exposing additional dark material (likely mud) as previously reported yesterday with some sheening still being observed. Ops crew is conducting low pressure flushing of this shoreline which appears to be effective.

Divisions A – Flushing continues.

Weir at Division B/C- No flow over weir observed today.

General Comments:

- Draft cleanup endpoint document under review.

Planned Activity for Tomorrow: Team 1 (without a SOSC or FOSC rep) to continue to act in SCAT-Ops Liaison mode. No point observations anticipated to be collected unless specific circumstances warrant.
